- Neighborhood nets and Comm. hubs
 - 1st Wed., reports

The meeting was called to order.

A motion was made, seconded, and passed to approve the August meeting minutes.

A motion was made, seconded, and passed to approve the agenda.

Training session

Planning for fall SET

- The date is now set for Nov. 13, even in the event of rain.

Disaster Plan

- A disaster plan is posted on the KARO-ECHO website.
- The first priority is to check your own family and home.
- Next - get on the KARO-ECHO frequency and see who else is listening.
- The first operator on the air generally becomes net control. Ask for check-ins and see who has backup power.
- If appropriate, go to the staging area and get reports from neighborhood operators. If no pre-arranged staging area has been planned, an improvised location may be required.

Digital Communication Mode Practice Net

- A new activity for those interested is a digital communication mode learning and practice net on the 3rd Monday of each month on the KARO-ECHO frequency, 146.415MHz.
- The first attempts will be made using FLDigi software and MT63 mode using acoustical coupling and manual PTT for those who do not have a wired interface.

Business session

Old business

- Two vacancies for KE officers, president and treasurer, will need to be filled next year.
- The cost for in-person meeting space in the Albany Memorial Building would be \$60/hr.
- An investigation as to whether the Kensington Youth Hut might be able to provide meeting space for free is still under investigation.

New business

- Self Assessment Form:
 - A checklist document is being prepared to evaluate skills we have practiced in Thursday evening nets and twice yearly SETs as well as skills we still need to learn.
 - The checklist included online classes which may conclude with an exam and certificate.
 - The aim is for each of us to learn which additional skills we could benefit from.

Technical / Infrastructure

- A goal is to install a patchbox at the KCC and antennas and patchboxes at Cerrito Vista Park and Canyon Trail Park, possibly before the November SET.

Treasurer report

- The treasurer report is in the newsletter.

Elmering

- NI6A has been providing ongoing help on multiple subjects.

Outreach / Recruiting

- What is needed before the November SET?

Neighborhood Nets / EOC Transmitter Checks

- Since our numbers are small, EC7 will join the EC8 neighborhood net on the 1st Wednesday evening at 8PM. The FRS/GMRS channel has been changed from 1 to 4 in hopes of having fewer other users on the same frequency.
- KJ6AAT continues to check the Richmond EOC radios each month
- KN6BUY is investigating testing the El Cerrito EOC radio monthly. Conselman

Quinto suggested an email to him would enable entry into El Cerrito City Hall.

A motion was made, seconded, and approved to adjourn the meeting.
